

EQUIMEDICAL®

The focus of HakiMedica is to bring innovative haemostatic agents to the surgical world, providing our clients only with high-quality cost effective products.

Equispon a complete bio-absorbable product adheres to the bleeding site and absorbs approximately 50 times its own weight. When implanted into tissue, Equispon is absorbed within 2 - 3 weeks

The Equispon Tampon is inserted in dry form by means of a proctoscope at the conclusion of surgery

Administrative Office Beirut Lebanon, P.O.Box: 15-5861 Bliss Saidani Str. Ittani Bldg.
