

HakiMedica is an exclusive distributor and in close cooperation with innovative producing Manufacturers in the Neurosurgery, Thoracic Surgery, Wound Treatment and Hemostatic agents. The companies we represent have developed easy to operate units and Consumables of extremely high quality standard which is indispensable today in varied medical fields.

Neurosurgery – Sonocas 300 and CPC

Removing brain tumors with ultrasonic dissection with the subsequent application of Cold Plasma Technology allows the coagulation of the resection surfaces. A wide range of options in neurosurgery is provided with the combination of Ultrasound and Cold Plasma Coagulation (CPC).

CPC-3000

- Low penetration depths (0,1-0,2 mm)
- No "overcooking" zones into tissue depths
- Vaporization effects
- Lower patient electrode needed
- The CPC-3000 represents Cold-Plasma Coagulation, Bipolar cutting and coagulation and Monopolar cutting and coagulation

Current application range:

- Coagulation of Parenchyma-Tissue
- Hemostasis of diffuse bleedings (e.g. liver / cholecystectomy)
- Coagulation in thorax surgery /
- Pleurodesis (e.g. Aero- & Hemostasis on lung tissue)
- Vaporization of tissue in various operations

Handpieces and Accessories

Macro LUD Laparoscopic Applications

Ultrasonic Handpiece for use with Sonoca 300 and Sonoca 400.
Recommended for many applications eg. laparoscopic/ transvaginal cholecystectomy, fundoplication, sigmoidectomy, adhesiolysis, partial splenectomy and laparoscopic liver resection.

Macro General Surgery

Ultrasonic handpiece for use with Sonoca 300 or Sonoca 400.
Recommended for many applications e.g. general surgery, liver surgery.

Ultrasound - HF General Surgery

Ultrasonic-HF handpiece for use with Sonoca Ultrasonic dissector - Sonoca 300 and Sonoca 400 and the MBC-601-UAM monopolar/ bipolar high-frequency device. Recommended for applications in general surgery e.g. liver resection, partial nephrectomy.

Liposuction

Ultrasonic handpieces to use with Sonoca Lipo or Sonoca 400.
For applications in Ultrasonic-Assisted Liposuction.

Wound treatment

Ultrasonic handpieces for use with Sonoca Ultrasonic dissector - Sonoca 400, Sonoca 300, Sonoca 190, Sonoca 185, Sonoca 180 and Sonoca Lipo. For applications in Ultrasonic-Assisted Wound Treatment.
